

14 April 2016

Benjamin M. Craig, Kim Rand-Hendriksen

EQ DCE Predictive Modeling Competition

### List of Teams

The table below shows the 18 teams that registered and were selected to participate in this competition. Each has an excellent foundation in health preference research and their submissions are expected to accurately represent the state of the science.

The exploratory data are currently available for download from the competition webpage. As an example, Benjamin Craig will post his predictions (form and csv) prior to 1 May 2016. The remaining teams will have from 1 May until **4 July 2016** to submit their predictions (form and csv). These predictions will be audited for completeness, combined and posted online by 15 July 2016. The team with the best predictions (smallest chi-square) will be announced by 17 September 2016.
